## DETAILED ACTION

### ***Election/Restrictions***

1. This application is a 371 of PCT/EP99/10470. For applications filed under 371, PCT rules for lack of unity apply.

2. This application contains inventions or groups of inventions which are not so linked as to form a single inventive concept. Under PCT Rule 13.1 the following combinations of claims of different categories are permissible and restriction to one of the following combinations is required:

I. Claims 1, 3-13, 18-30, 32-36, 43-55, drawn to a method of preparation of a population of circulating cells by administering to a donor a composition comprising growth hormone.

II. Claims 2, 4-13, 17-26, 31, 55, drawn to a method of preparation of a population of circulating cells by administering to a donor a composition comprising growth hormone and G-CSF.

III. Claims 14-16, 18-30, 32-55, drawn to a method of preparation of a population of circulating cells by administering to a donor a composition comprising growth hormone and (a hematopoietic growth factor or a chemokine).

IV. Claims 14-16, 18-30, 32-55, drawn to a method of preparation of a population of circulating cells by administering to a donor a composition comprising growth hormone and monoclonal antibodies.

3. Claims 29-55, which recite "use of human growth hormone to prepare medicament.....", are interpreted as being drawn to a composition comprising growth hormone.

Pursuant to 37 C.F.R. 1.475(d), this Authority considers that the main invention in the instant application comprises the first-recited method, namely a method of preparation of a population of circulating cells by administering to a donor a composition comprising growth hormone and the first recited product, namely, a composition comprising growth hormone. Further, pursuant to 37 C.F.R. 1.475(b)-(d), the ISA/US considers that the materially dissimilar methods of group II-IV, using products that are

Art Unit: 1647

different than the product used in Group I, and thus, do not correspond to the main invention. This Authority therefore considers that the several inventions do not share a special technical feature within the meaning of PCT Rule 13.2 and thus do not relate to a single general inventive concept within the meaning of PCT Rule 13.1.

**Species Election:**

4. Claims 16, and 35, recite several compounds that the composition of claims 1-3 should further comprise or should be administered with the composition of claims 1-3.

The species recited in claims 16 and 35, do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The recited cytokines and chemokines lack the same or corresponding special technical features, because they have different structures and functions.

Applicant is required, in reply to this action, to elect a single cytokine or chemokine (depending on which species is elected) to which claims 16 and 35 are restricted to. The reply must also identify the claims readable on the elected disease, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art by their recognized divergent subject matter as defined by MPEP § 1850. Therefore, an initial lack of unity for examination purposes as indicated is proper.

Art Unit: 1647

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
